TODAY'S ENTRY

Discipline is hard when motivation is gone. But showing up when you don't feel like it... that's where the real change happens.

UI/UX DESIGN

8 ESSENTIAL MOBILE APP SCREENS EVERY APP SHOULD HAVE

These screens form the foundation of a seamless user experience in every mobile app.

1 Intro / Splash Screen

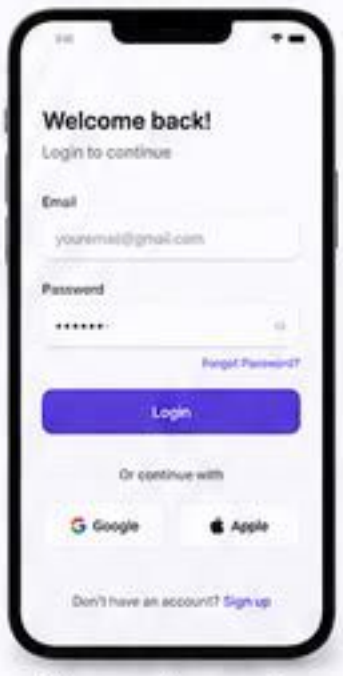

First impression matters. Show your brand and make it memorable.

2 Welcome Screen

Introduce your app and communicate the core value to users.

3 Login Screen

Allow users to securely access their accounts or create new ones.

4 Onboarding Screen

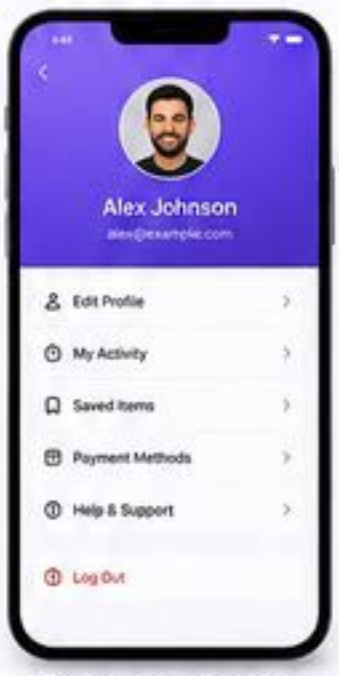

Educate users about your app's features and how it can help them.

5 Home Screen

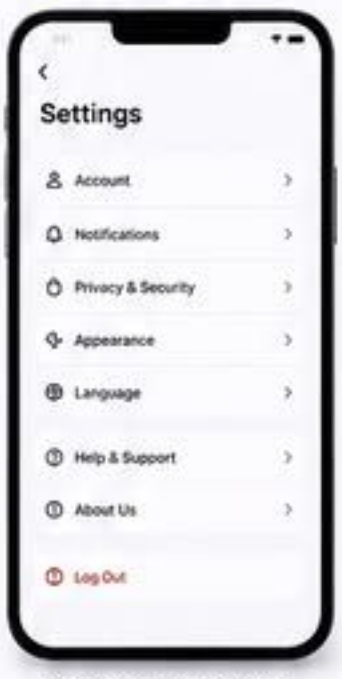

The main hub where users perform key actions and access important features.

6 Profile Screen

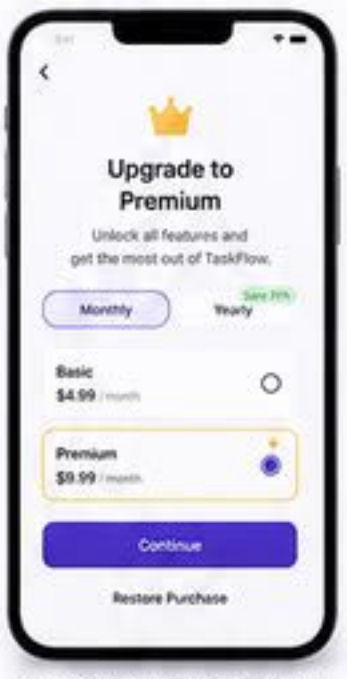

Let users manage their personal information and preferences.

7 Settings Screen

Give users control over their app experience and personal preferences.

8 Subscription Screen

Monetize your app and offer premium features to users who need more.

WHY THESE SCREENS MATTER

- Improve User Experience
- Create Smoother User Journeys
- Build Professional App Designs
- Essential for UI/UX Portfolios & Case Studies

SAVE THIS PIN FOR LATER!

You'll thank yourself when designing your next app.

Hi! How can I assist you today?

What is web3?

00:05

What is Web3?

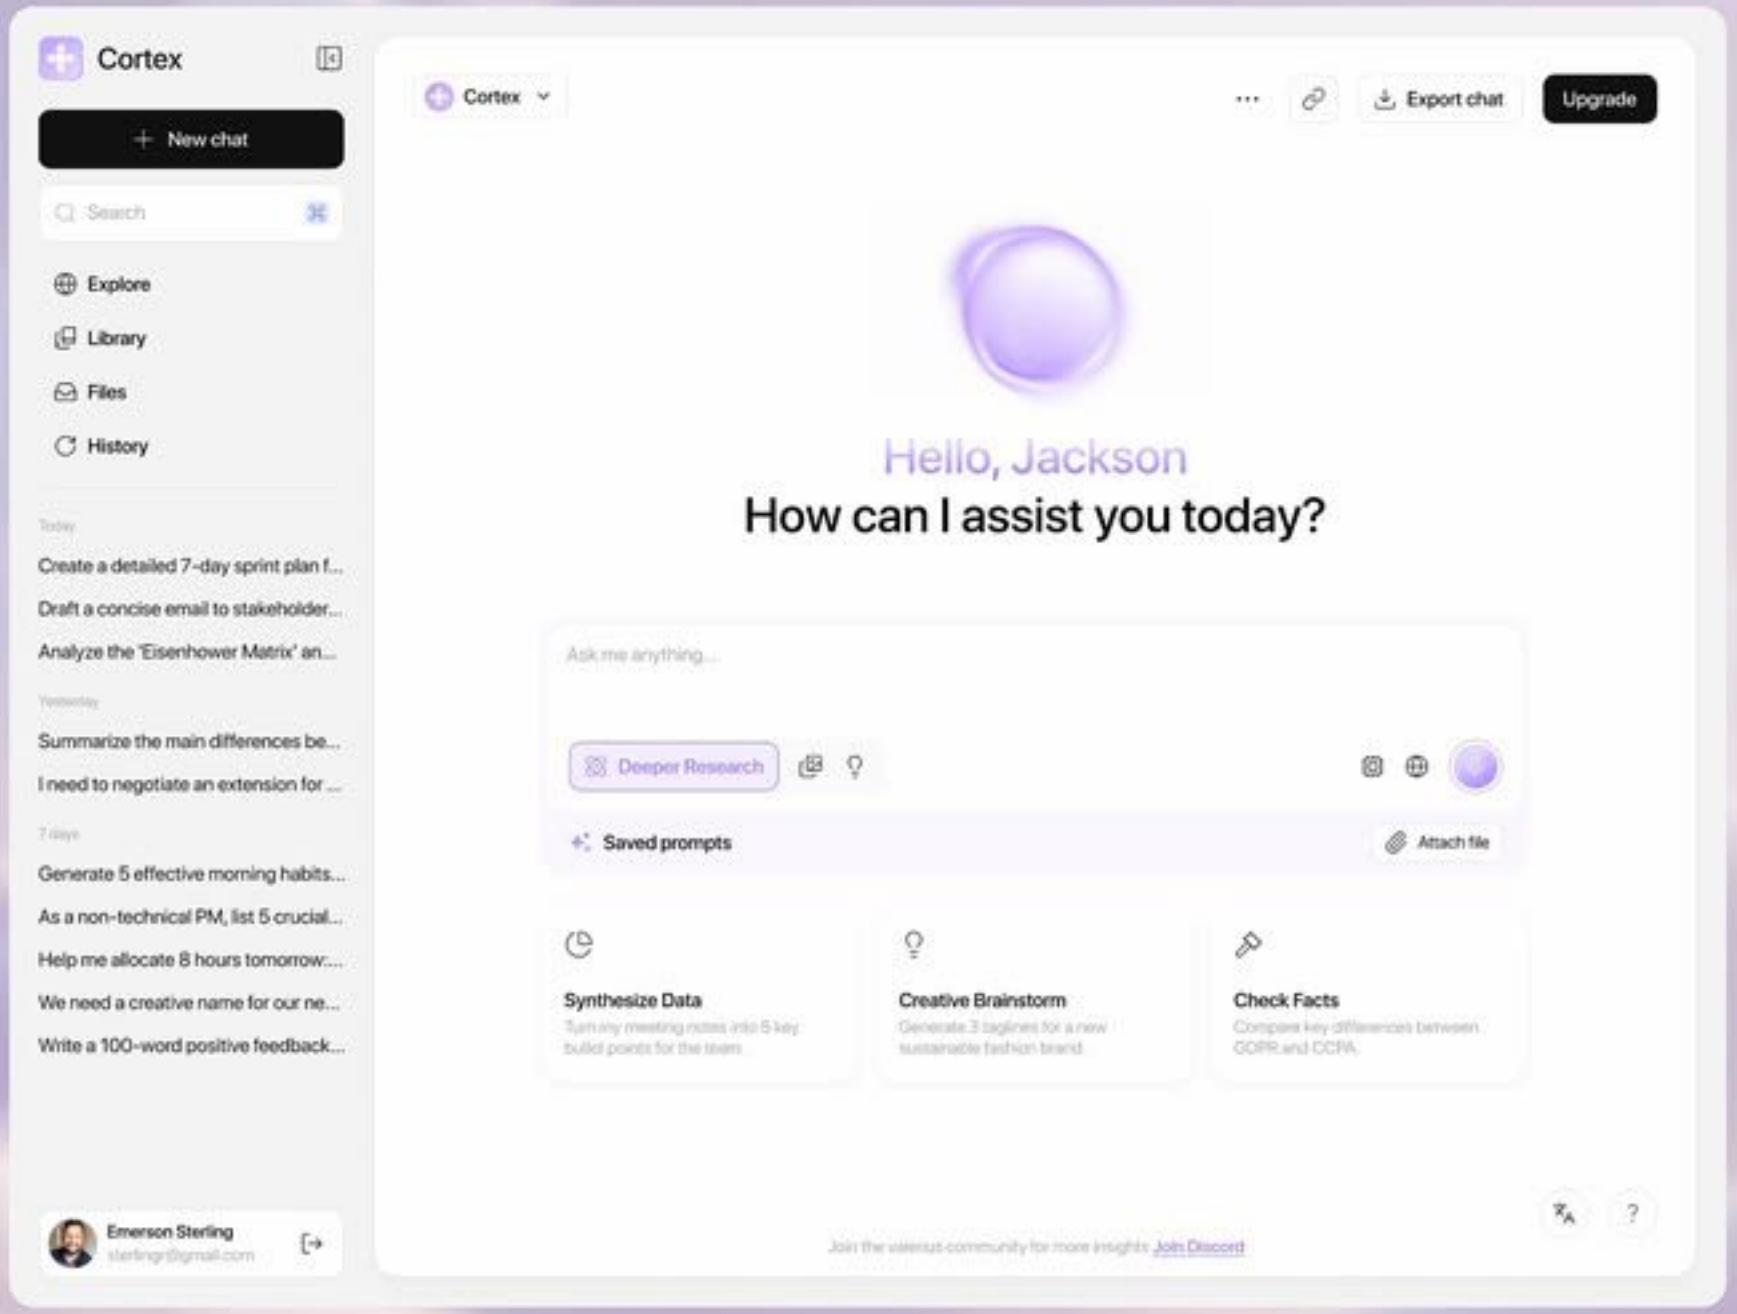

Web3 is a decentralized internet built on blockchain, giving users control over their data, identity, and digital assets.

Key Features of Web3:

1. Decentralization

- No central authority (data is stored across multiple nodes, not in one place).
- Users own their content and identity.
